Gore Realism

How to install ?

The Installation is very Simple First of:

You will need OpenIV here is a Quick Tutorial showing you how to install OpenIV if, you have any Issues or don't really know how to install it.

The 2nd Step is to Create a Mods folder and install all the ASI Files of OpenIV. I also Recommend Creating a Backup while Installing Mods.

The Final Step is to download this Mod and Install it via OpenIV Modpackage Installer, You simply drag and drop the OIV File into OpenIV and click Install.
